

4th Gen. Toyota Rav-4 Ladder Installation

Start by cleaning the area where the bracket will be installed
With rear hatch door shut, place and stick top bracket 2.5" over from edge of spoiler gap as shown in **photos 1&2.**

Place the ladder onto the upper bracket in the provided slots (under top of the ladder). It should slip into place and lock as shown in **photos 3&4.**

With rear door open, align bottom of the ladder parallel to the bottom of rear hatch door. Attach bottom bracket, with provided screws, to base of ladder (over the lip of the bottom door hatch), as shown in **photo 5.**

**** Additionally, we recommend that you add a clear protective vehicle film in all areas where brackets will come in contact with the vehicle, as an added protection if you are concerned about the possibility of scratching. you can find this on amazon.**
